Lisa *Lovera*

UX/UI Designer & AI Consultant

I design digital experiences and AI solutions starting from the people who will use them. Through LL Studio I help small and medium-sized businesses adopt AI in practical ways, from process analysis to tailor-made tools, combining UX research, interface design and generative AI.

EXPERIENCE

Founder & AI Consultant · LL Studio

2026 – present

- AI consulting for SMEs: AI Audit & Roadmap, custom implementation and team training.
- Design of WhatsApp assistants, document-flow automation and private RAG assistants, built with Make and Claude API.
- Human-centred method: needs analysis, experience design, development and KPI-based measurement.

Digital Learning Specialist (Internship) · Choralia Srl

10/2025 – 05/2026

- Seven-month internship in AI for organisations and corporate training.
- First-hand analysis of how SMEs adopt AI and where operational implementation stalls.

UX PROJECTS

Thesis: interface for metadata selection in systematic reviews

Web app with filtering, tagging and visual prototyping to speed up researchers' workflow; validated through user testing and iterated on usability heuristics.

Conad App: sustainable grocery shopping

Mobile app to reduce food waste: from user research to smart shopping lists, expiry tracking and anti-waste recipes. Validated by 18 users across all age groups.

TantoGuanto · Startup Weekend Siena

1st prize

Custom glove for wheelchair users; selected for the Beeco and IKIGAI acceleration programmes.

EDUCATION

HR GenAI Architect Program

05/2026

Choralia Srl · Certified training programme

Generative AI, advanced prompt engineering and data analysis supporting HR and business functions.

Master's Degree in Communication Strategies and Techniques

2023 – 2025

UX Design track · University of Siena
